

## **Continuity of Education and Education in Technology**

**Mahfuza Rahimjanovna Shermatova**

Teacher at Namangan State University

**Abstract:** *Young generation perfect by doing bring up necessary our society as a whole in development own knowledge: work, professions with contribution additions pedagogue educators in front standing the most important from tasks one and education \_ integrity with is determined.*

**Keywords:** *education, method, method, system, continuously education, national program, reform do, mature, psychological, moral, creative, unlimited.*

Uzbekistan \_ Republic The Supreme Assembly was held on August 29 , 1997 acceptance made " Education about". new the law and " Personnel preparation national program" of education in the field our policy set gave \_ Continuously education organize to reach development principles continuously education reform do , continuous education system and types issues cover received \_

stated by the first President IA Karimov , "Each of a person especially just now to life step put coming of young people to his mind so the idea absorb they should \_ to the middle placed to the goal reach to themselves depends that , that is this things their fixed step , enthusiasm , enthusiasm , full selflessness and infinite to their hard work depends that realize reach need ".

**23 , 2020 in September acceptance made " National program " own young generation national in the spirit bring up with separately to the seat have \_ President Sh Mirziyoyev of the country development the youth , the people national spirituality upgrade saying that it will be determined those who passed**

the students to labor has been interest own on time determination and to them work qualifications loved in training improvements help to give very important \_ In this , the students attention the most simple item toys , games , study weapons preparation , patterns drawing and cut off take , application works link will be done . From this except in children to labor interest awakening , technology in their classes harvest done knowledge expand and deepening , skill and qualifications strengthening for "Skillful hands " circles , on extended groups from the class except things organize reach to the goal is appropriate .

Labor the most important the will and moral of adjectives development help gives \_ Technology in education to labor psychological preparation , work of activity right motives is brought up , of the person each one conscious hard worker for necessary has been qualities is formed . If you have a child each one in step orderliness , precision compliance to do to the necessity trust harvest if not , the children to labor love in the spirit in education to success reach about to speak difficult \_

Labor qualifications culture it or this work in the process defined in order and consistency of action compliance to do need regularly explaining to go with together to be a lot exercise to do as a result content finds \_ Students \_ in the middle to the road placed mutually help and in them friendship , solidarity , brotherhood , generalization , together work get , public such as qualities educates . Our

society of development present stage of labor character and to the content , the person to life to prepare high requirements puts \_ Accordingly \_ \_ each one person to life in education sure changes to do it is necessary Each \_ in the pupil modern worker of the person qualities formation for of the school initial in classes and even earlier before school in institutions , later from school high in classes education and education develop later \_ profession in colleges own knowledge continue to continue it is necessary Whole strength and abilities political knowledge circles expansion , modern knowledge with arming and physical labor each bilaterally harmonize to get from teaching consists of

Technology education and to the profession preparation duties start drinking in schools whole education and education in the system and all study subjects using solution will be done . This is the place technology lessons leader plays a role . At school regularly technology of education initial stage initial in classes work in their classes and small school age the children from the hand coming social useful it's work . If you have a child each one in step orderliness , precision compliance to do to the necessity trust harvest if not , the children to labor love in the spirit in education to success reach about to speak difficult \_ Labor qualification and skills formation as follows main from stages content finds :

- a) start understanding \_
  - b) labor actions test for perform \_
  - c) work actions .
  - d) end release \_
1. The indicated action is to the goal according to , all exemplary in relationships to be
  2. Show \_ of the sample conscious perception to be done help to give need \_ He is a teacher of the student attention of action the most main important to the side way , other action not exactly \_ that's it of action to the goal compatibility justification , their design conscious possession reach it is necessary That's why for to show always short explanation with together goes \_
  3. Show an example of action students by active perception to be done provide need \_ Activity thinking in the activity and showing \_ thing perception in reaching the work volume of the amount in the increase is expressed .
  4. The action shown is all details with each one to the student good appearance need \_

Labor qualifications and skills formation in the process exercises . Labor qualifications and skills \_ to form intended exercises only to time according to when distributed and known system based on only when transferred positive the result gives \_

Submitted to work responsibility feeling and work in discipline education , training \_ work release with together take going health and young for useful , society for necessary work consistency done increases . Get started in schools technology education and education main duties students to labor training , teaching and general education of schools initial in classes occupation choose consistency improvement , state education standards demand according to bring up and students profession the owner being in delivery theoretical and practical knowledge from giving organize found \_

Get started education studying in the fields students in the future high qualified expert personnel reached in preparation them of teaching different methods skillfully use skills content find big important have \_ Current at the time in education of teaching traditional methods with together different different unconventional methods is being used . Because they are exactly to the individual directed \_ is the following properties owner : pedagogue teaching to the process students subject as attraction does ; different the work methods applies ; problematic from teaching wide uses , individualized and classified training , information and new pedagogical labors to education current is enough Such training \_ of students not only knowledge and skills , maybe abilities develops and opportunities expands

Get started education of classes efficiency the following of conditions to be fulfilled dependent : from time fruitful use \_ of the lesson topic and purpose sure set ; tasks right apply to know and consistent do it from getting consists of He is a teacher to class get ready standing , his structure determines \_ Knowledge control do , concept give , strengthen , new and previous knowledge control to do , knowledge generalization and in order to put how from scouting transfer \_ the importance of asking during his which from the type use need note does \_ To the demand of time suitable technology lessons of teaching forms realized without the chosen one , in particular , the whole class , group and alone in order training harmonized with is characterized .

of the lesson all duties in advance defined and plan Created if so , ten pourable all requirements perform easy will pass He is a teacher lesson the plan make up standing , his main transfer the purpose , structure , content , project method and styles , equipment , organization to do forms determines \_ In particular , research approach is problematic lessons , programmed teaching-pedagogical work to the basics relied on without lessons organize to do reach his didactic demand solution doer main is a factor . This is the place the lesson right planning , it parts separation ; lesson type set ; didactic the goal with just like that to be done structure designation education goals to reach important part is considered[8].

We are \_ from our experiences come came out without students future professional to the activity in preparation of teaching the following unconventional methods to use recommendation we deliver :

1. Mental attack method use \_ \_ In this, the students placed \_ of the problem essence realized without initial thought conduct skills is formed . With that together they are their own thoughts free statement to achieve , justify , protect to do , of others thoughts to hear and respect to do they learn
2. Students small to groups to be \_ In this they have the team be \_ thinking and the work perform , own of the team winner to be aspiration characteristics develops.
3. Entrepreneurship and role-playing from games use \_ In this the students independent , creative and practical the work perform abilities manifestation will be and develops . Previously occupied knowledge and skills \_ enrichment , new situations apply possibilities opens .
4. Problematic question and circumstances analysis to do This method of the students creative , logical thought scientific , free \_ \_ to debate to enter , treatment culture learning , resourcefulness characteristics development directed . This is it methods of students thinking , understanding , imagination to do , practical the work perform abilities to develop possibility giver simple and efficient methods is considered[9].

Summary independent each don't worry to maturity enough perfect a person for necessary has been spirituality edges faith , belief , patriotism , to man infinite love friendship , loyalty , work love , national pride such as qualities formation necessary \_ Labor to honor work of the people value his hardship for diligently fight , grow maturity finding young to generation education to give in the process to labor relationships formation necessary is young \_ generation our society in development own Knowledge : Work , professions with contribution additions pedagogue educators in front standing the most important from tasks one is considered Small class students \_ hand to work to teach main purpose , initial work telements stages ie executable of work simple elements ( papers folding , cutting , gluing , geometric figures making , application works ) . to make with they start
