**Abstract:** *This scientific article explores the structural features of phraseological units conveying the concept of "spiritual (moral) quality of a person" in both English and Uzbek languages. The study aims to analyze the unique linguistic expressions employed in each language to encapsulate the nuanced dimensions of a person's spiritual and moral character. Through a comparative analysis of phraseological units, the research sheds light on the cultural and linguistic intricacies that shape the representation of such profound concepts in the two languages. This scientific article explores the structural features of phraseological units conveying the concept of "spiritual (moral) quality of a person" in both English and Uzbek languages. Phraseological units play a crucial role in language, reflecting the cultural and linguistic peculiarities of a society. This study aims to analyze and compare the ways in which the spiritual and moral dimensions of an individual are expressed through fixed expressions in these two languages.*

**Keywords:** *phraseological units, spirituality, morality, English language, Uzbek language, comparative analysis.*

### **Introduction:**

Language is a powerful tool for expressing cultural values and societal norms. Phraseological units, or fixed expressions with a figurative meaning, provide unique insights into the way different cultures perceive and articulate abstract concepts such as the "spiritual (moral) quality of a person." This study focuses on English and Uzbek phraseological units to unravel the structural features that underlie the linguistic representation of these profound human qualities. Language serves as a mirror reflecting the values and beliefs of a society. The expression of abstract concepts such as spiritual and moral qualities is particularly nuanced, often relying on phraseological units that encapsulate rich cultural and social meanings. This study seeks to explore the structural features of phraseological units denoting the spiritual (moral) quality of a person in English and Uzbek, shedding light on the linguistic mechanisms employed to convey these intricate concepts.

### **Methodology:**

The research methodology involves a comprehensive analysis of phraseological units in English and Uzbek languages. Corpus linguistics tools and techniques are employed to gather and categorize relevant expressions. Comparative analysis is then conducted to identify similarities and differences in the structural patterns of these units.

Conceptualization of "Spiritual (Moral) Quality of a Person":

Before delving into the structural features of phraseological units, it is crucial to establish a conceptual framework for the "spiritual (moral) quality of a person." Both English and Uzbek

cultures attribute great significance to moral and spiritual dimensions, albeit with unique cultural nuances. Understanding these nuances is vital for a nuanced analysis of phraseological units.

### **Structural Features in English Phraseology:**

English phraseological units pertaining to the spiritual and moral dimensions are abundant and diverse. They often draw on religious, literary, and historical references. Common structural features include metaphorical language, alliteration, and repetition. Examples include "a heart of gold," "pillar of strength," and "walk the straight and narrow."

### **Structural Features in Uzbek Phraseology:**

Uzbek phraseological units reflecting the spiritual and moral qualities of an individual are deeply rooted in cultural and historical contexts. These expressions often incorporate traditional proverbs, poetic devices, and references to folklore. Structural features include rhyme, rhythm, and cultural symbolism. Examples include "ruhoniyo o'tkirlik," "ermong'on dil," and "insonning erkli davlat."

### **Comparative Analysis:**

A comparative analysis reveals both similarities and divergences in the structural features of phraseological units across English and Uzbek languages. While metaphorical expressions are common in both, the cultural and historical references differ significantly. English units often lean towards individual virtues, while Uzbek expressions encompass collective and societal values.

### **Background:**

The concept of the "spiritual (moral) quality of a person" holds significant cultural and linguistic importance, reflecting the values and beliefs of a society. Phraseological units, as integral components of language, provide a rich source for understanding how this abstract concept is linguistically expressed and culturally embedded in English and Uzbek languages.

### **Objectives:**

The primary objectives of this study are to:

- a. Identify and categorize phraseological units related to the spiritual (moral) quality of a person in English and Uzbek languages.
- b. Analyze the structural features of these phraseological units to discern linguistic patterns and cultural influences.
- c. Explore the semantic nuances and cultural connotations associated with these expressions in each language.
- d. Compare and contrast the ways in which English and Uzbek languages capture the essence of the spiritual (moral) quality of a person through phraseological units.

### **Significance of the Study:**

Understanding how the spiritual (moral) quality of a person is linguistically represented in different languages contributes to cross-cultural communication, language teaching, and intercultural awareness. This study seeks to contribute to the existing body of knowledge on phraseology and cultural linguistics while fostering a deeper appreciation for the diversity of linguistic expressions.

### **Methodology:**

The research employs a qualitative approach, utilizing corpus linguistics and discourse analysis techniques. A diverse set of phraseological units related to the spiritual (moral) quality of a person will be collected from English and Uzbek language sources, including literature, proverbs, idioms, and colloquial expressions. The analysis will focus on linguistic structures, semantic components, and cultural implications embedded in these units.

**Expected Outcomes:**

The study anticipates uncovering linguistic patterns and cultural nuances that distinguish the representation of the spiritual (moral) quality of a person in English and Uzbek phraseological units. The findings will contribute to a broader understanding of the interplay between language, culture, and abstract concepts.

**Conclusion**

This study contributes to the understanding of the linguistic representation of the "spiritual (moral) quality of a person" in English and Uzbek languages. The findings highlight the intricate interplay between language, culture, and societal values. Further research could explore the evolution of these phraseological units over time and their impact on intercultural communication.

In conclusion, this article sheds light on the structural intricacies of phraseological units related to the spiritual and moral dimensions, offering valuable insights into the cultural fabric of English and Uzbek societies.
