The article describes the effective ways of preventing and putting an end to offenses among minors, identifying the causes and conditions of their occurrence, analyzing and eliminating them.

It is difficult to imagine the development of society and country without knowledge and education. Helping the service system, providing political and economic support, developing the market, developing the market to help our country and the arts to emphasize science and enlightenment.

"As the sages of the East said, "... The greatest inheritance is a good education, The greatest poverty is ignorance!" Therefore, for all of us, the acquisition of modern knowledge, the acquisition of true knowledge and high culture, should become a continuous vital need.

It helps to develop and take measures to protect the infringements in our country and to set the production process in the right direction. . Juvenile delinquency prevention and social services solution, primary employment provision and adult

The announcement that 2020 is the year of development of science and computer economy is stable. <https://www.pv.uz/uz/news> January 24, 2020.

To activate the involvement of the underprivileged in social activities, to develop measures for the meaningful organization of free time.

The President of the Republic of Uzbekistan Shavkat Mirziyoyev said about the development: "Based on the conclusion that 'Justice is in the strength of the heart', we have been motivated to strengthen the sense of tolerance for entertainment and criminal behavior in our society." The limitation of these infringement actions is emphasized. For this, we need to send a wide distribution from the neighborhood, order the work and responsibility of the prevention inspector first, and create a decent service and living conditions for them."

In life, the level of development of the hoouky Maganitnit, the Future Successor Bomphish hhar The hhouk and liberties of an intelligent and qjarr and their Effective Use. However, the processes of modernization and democratization of society require the social and political activity of young people. Today, raising the legal culture of the minor, who is considered the future of the country, is becoming one of the youth strategists.

Socialization is a person's participation in social relations through learning the knowledge and norms created by society and changing behavior. The legal life of minors is strongly influenced by the existing family, education and social environment. Therefore, he could not talk about the legal education of minors without taking into account the signs of socialization.

Adolescents get their first ideas about law, politics, state and society in their families, in preschools, comprehensive schools, and then in academics of the lyceum and vocational colleges. However, the lack of legal documents becomes clear, especially when moving to a new social environment - a country of higher education. In a new social environment, a student is faced with new legal norms and procedures and is forced to obey them. Legal education, legal education, legal culture is the main tasks of students for the new social environment.

Minor's social, religious, economic, political, Exhibition of the President-elect of the Republic of Uzbekistan Shavkat Mirziyoyev at the solemn ceremony dedicated to the 24th anniversary of the adoption of the Republic of Uzbekistan and the Constitution. People's water newspaper, December 8, 2016

As a result of legal and cultural socialization, he manages to find his place in society. The reason is that a social person accumulates experience by learning written and unwritten norms in the recorded stable trends of life since childhood. As a result of THGri socialization, minors gain social activity.

"The Social Activity is the Participation of the Social Substar (Jamyat, Class, Guru, and Individuals) in the Semi-Political Areas, Cultural-Culture huukahlari huukahlari Social activity is the main condition for a person to find his place in society and to be aware of his behavior.

Three Types of Social Activity Content: Social-political currents; culture; labor activity on the edge of work and life is manifested in the edge of labor relations and remains connected with the movement of subjective professional and social tasks. Recognizes as the basis of social activity, as a type of Determinant. On it, according to the tune: cooperation, action for organization, participation in scientific and technological output, rationalization, inventiveness and other initiatives.

Socio-political currents and culture and life activity are manifested in a person's activity in social-political, cultural-educational currents, personal life. Social activism, self-awareness and self-control, which are its foundations, are evident from adolescence. In fact, in a minor, interest in the inner world of oneself, the main one, deepens and turns into a state of differentiation and generalization.

Legal socialization of a minor shows his active commitment to the life and practice of public law. This level of commitment increases as a person gradually reconciles his legal knowledge and is reflected in his level of right and voluntary compliance with legal norms. Based on the fact that the legal education of minors is a strategic issue, it is necessary to reconsider the methods of education in today's continuous education system. We need to teach our children the ability to make decisions.

In the socialization of our society, special attention should be paid to the education of our minors as a strategic issue. Indeed, the first condition of the free social spirituality defined as our state in this regard is directly correct the practice of raising and educating a free person capable of self-defense and fighting for it. Directly helps to form.
